

South Bank Dental – County Hall, London

The refurbishment was very challenging and the design was paramount to comply with the Local Authority and English Heritage due to the Listed Building status of the County Hall Building.

The Project consisted of 3 Treatment Rooms, a Decontamination Room, Plant Room, Staff Room and a Reception and Waiting area. All existing architectural features were incorporated into the design to create a modern practice in a historic building. All new electrical, plumbing, air conditioning and ventilation services were installed as part of the interior refurbishment of a historic London landmark
